Solid and screen bowl centrifuges

Solid & screen bowl centrifuges

FLSmith's Decanter brand has earned its proud reputation throughout 20 years of serving the centrifuge industry. Decanter centrifuges and services are found on 6 continents. No matter where a customer is located, no matter what the application, FLSmith is ready to provide the very best Decanter products, parts and services available.

FLSmith takes great pride in delivering a comprehensive range of flexible, customized product solutions that put you in the position to get the most out of your business. FLSmith's Decanter brand started as a service company, so we understand the importance of having your system working at peak efficiency. You can count on us to ensure your complete satisfaction in all of our products and services. Whether it is service or repair of an existing system or custom building a completely new centrifuge, FLSmith is committed to you.

Centrifuges

FLSmith's Decanter centrifuges are designed to be cost effective and simple to operate, ensuring that a customer's application is operating at peak efficiency. FLSmith can provide new or remanufactured solid and screen bowl centrifuges for any application.

- Installation and start-up services

Repair services

At FLSmidth the commitment to quality doesn't end at the purchase or servicing of your existing machine, it follows throughout the life of the machine. That is why many companies turn to FLSmidth for all of their service and rebuild needs.

FLSmidth is an ISO 9001:2008 certified company. What does this mean to our customers? This strict certification assures all of our customers receive the most current standards of craftsmanship, documentation and repairs. FLSmidth repaired machines are like new and run more efficiently because of our dedication to quality and workmanship. We also manufacture and fabricate many of the replacement parts for other brands of centrifuges.
